

DEEPANSHU KUMAR SHARMA

Senior BI Consultant | Data Analytics & Visualization Expert

+91 8287395605 • deepuk.sharma8@gmail.com • Noida, India • [linkedin.com/in/biqlikker](https://www.linkedin.com/in/biqlikker)

PROFESSIONAL SUMMARY

Results-driven Senior BI Consultant with 6+ years delivering enterprise Business Intelligence solutions across automotive OEM programs (AUDI, Porsche, Skoda). Expertise in Qlik Sense, Power BI, SQL, and AWS Athena with a proven track record of automating reporting workflows — achieving up to 95% effort reduction — and translating complex stakeholder requirements into actionable dashboards for Finance, Aftersales, and Sales & Marketing teams.

CORE COMPETENCIES

BI & Visualization: Qlik Sense, QlikView, Power BI, NPrinting, QMC, Set Analysis, GeoAnalytics, Access Management

Query & Scripting: SQL (MS SQL, SAP SQL, AWS Athena), DAX, M Query, Power Query, Qlik Script

Data Modeling: Star Schema, Snowflake Schema, ETL Pipeline Design, Data Transformation & Cleansing

Analytics: KPI Design, Trend Analysis, Forecasting, Predictive Analytics, Writeback Solutions, P&L Reporting

Cloud & Infrastructure: AWS (S3, EC2, Athena), Power BI Service, Row-Level Security (RLS)

Automation & Optimization: Report Automation, Data Ingestion Scripts, Business Rule Implementation, Performance Tuning

Collaboration: Agile Delivery, Cross-functional Stakeholder Management, Microsoft Excel

PROFESSIONAL EXPERIENCE

Senior BI Consultant | **Motherson Sumi** | Noida, India

June 2022 – Present

Porsche Aftersales Analytics

January 2025 – Present

- Architected aftersales dealership dashboards using AWS Athena, delivering real-time visibility into parts, labor, and service hours utilization
- Developed Parts Ageing reports enabling proactive inventory management and improved aftersales strategy for Finance teams
- Partnered with Finance and Aftersales stakeholders to define and align KPIs with business goals

AUDI Customer Data Platform (CDP)

August 2022 – May 2024

- Built standalone Data Hygiene dashboards to improve data quality and governance across CRM datasets
- Designed and deployed NPrinting-based daily sales alert reports for proactive sales monitoring
- Developed a Qlik Sense Writeback solution capturing customer inputs directly into the BI platform, streamlining data collection workflows
- Managed end-to-end ETL processes for daily and monthly reporting cycles, ensuring data accuracy and timeliness
- Built GeoAnalytics dashboards to visualize customer and dealer locations, enabling regional sales and concentration analysis

P&L Analytics

October 2023 – June 2024

- Built hierarchical drill-down analysis across business units, cost centers, and time periods
- Translated Finance team requirements into actionable P&L visualizations and drill-through reports
- Automated P&L reporting processes, reducing manual report preparation time by 90%

Skoda Sales Analytics

October 2023 – Present

- Engineered end-to-end sales dashboards using SQL, AWS Athena, and Power BI delivering real-time sales and marketing insights
- Automated O&C, DSR, and ETBR reports, reducing report generation effort by 95% and enabling faster business decisions
- Delivered actionable analytics supporting dealer performance management and sales strategy

Spend Analytics

July 2023 – June 2024

- Developed Power BI dashboards integrating SQL and Excel data sources for enterprise-wide spend visibility
- Defined and implemented spend KPIs in partnership with Finance teams to align reporting with strategic goals

Data Hygiene Project

June 2022 – November 2022

- Designed automated data ingestion scripts and business hygiene rules to enforce enterprise data quality standards
- Reduced data redundancy and improved data integrity across CRM datasets using structured triggers and validation rules

Subject Matter Expert | Evelyn Learning Systems | Noida, India

September 2019 – November 2021

- Built academic data analysis dashboards supporting research teams with insights from complex datasets
- Conducted data cleansing, transformation, and visualization projects for institutional reporting
- Mentored learners in Excel, data analysis concepts, and analytical thinking frameworks

KEY ACHIEVEMENTS

- 95% reduction in report generation effort — automated Skoda O&C, DSR, and ETBR reporting pipeline end-to-end
- 90% reduction in manual effort for P&L reporting through automated hierarchical drill-down dashboards
- 85% reduction in manual reporting effort for Spend Analytics through Power BI automation
- Delivered enterprise Qlik Sense Writeback solution enabling direct customer data input within the BI platform
- Improved data quality across multiple OEM CRM platforms via structured data hygiene frameworks
- Simultaneously led BI delivery across 5+ concurrent OEM projects — AUDI, Porsche, Skoda — under Motherson Sumi

EDUCATION

Master of Science (M.Sc.) — Mathematics & Statistics

2017 – 2019 | CGPA: 7.0

Amity University, Noida

Bachelor of Science (B.Sc.)

2014 – 2017 | 71%

University of Delhi
